Load Management Program application form

In order to provide our members with the best possible service and ensuring safety, North Itasca Electric requires completion and adherence to this form.

Electrical energy consumed by the load management sub meter will be billed at the current load management rates. These rates may change at any time upon board approval.

North Itasca Electric Cooperative will furnish and maintain load management receivers which will remain the property of North Itasca Electric.

Members are responsible for the installation of all load management equipment and wiring. The installation and operation must be in compliance of the National Electric Code and of North Itasca Electric's policies.

North Itasca Electric reserves the right to inspect and test all load management equipment at any time verifying proper operation.

Members are required to have an adequate backup heat source for the appropriate program along with correctly sized equipment.

Violations of load management policies may result in the removal from the program.

In the event that North Itasca Electric needs to make a second trip due to an incomplete installation, a \$50.00 charge may be applied.

Load Management Program desired

Check Load Control Programs desired: Existing Equipment Installed: (If any)
